

ZIP ALERT

Vol. 5, No. 5

August 1996

Software Matching Problems

The Address Management office of Mid-Florida is experiencing difficulty with mailers using the incorrect city name with ZIP Code 32762. Apparently, mail addressed to PO Boxes in Oviedo FL 32762, is being changed on some mailers' lists to Okahumpka FL 32762. In particular, a customer using PO Box 620478, Oviedo FL 32762-0478, is receiving mail changed to PO Box 620478, Okahumpka FL 32762-0478.

The problem is the result of implementation of a 3-digit area change for many Address Management offices within the Central Florida 327 area in 1989. At that time, the Okahumpka office was changed from 32762 to 34762. In August 1995, assignment of ZIP Code 32762 to the Oviedo Post Office for post office boxes was approved.

ZIP Code 32762 is now effective and in use. Notice of the ZIP Code becoming active was given in the July 1995 edition of *ZIP Alert*.

City/State File

The most widely-used Address Management System (AMS) electronic data products is the City/State File. The file contains approximately 80,000 records representing approximately 43,000 ZIP Codes and is available to those who subscribe to any AMS street-level products, including ZIP+4, Carrier Route Information Systems, and Five-Digit ZIP. In addition, the City/State File is also available as a separate product.

The City/State File consists of three record types: the Alias record, the Zone Split record, and the Detail record. The Alias record contains alternate names for streets maintained at the 5-digit ZIP Code level. The Zone Split record identifies a carrier that has changed ZIP Codes or select deliveries that were moved to a different route number within the same ZIP Code. The Detail record lists all city names associated with each ZIP Code.

In addition to the ZIP Code and city-name information, the City/State File contains the following information on each ZIP Code:

ZIP Classification Code – The type of ZIP area a 5-digit ZIP Code serves. ZIP classes include unique, military, PO Box or other

City/State Name Abbreviation— a standardized thirteen-character designation for a City/State Name. The code is only used for names greater than thirteen characters. In addition, if the City/State Name Facility Code is N, this field is blank.

City/State Name Facility Code – Type of postal facility with which the city name is associated.

City/State Mailing Name Indicator – Field that specifies whether the city/state name can be used as the last-line of an address on a mailpiece.

Attention

RIBBS is available on the internet at
<http://www.ribbs.gov>

If the city name is approved, the mailing name indicator is Y.

Preferred Last Line/City State Name – Field used if the city name provided is not an approved mailing name.

City Delivery Indicator – Field that indicates whether the ZIP Code has city delivery.

Carrier-Route Rate Mail Indicator – Indicator that specifies whether a discount is provided for letter-size carrier-route sorted mail for the ZIP Code.

Unique Name Indicator – Field that specifies whether the city name record contains the organization name of the firm or other entity to which the ZIP Code is assigned.

Finance Number – A 6-digit number assigned to the post office with administrative responsibility for the ZIP Code.

State Abbreviation – The 2-letter designation of the state to which the ZIP Code is assigned.

County Number – The 3-digit number assigned to the county or parish served by the ZIP Code. If the ZIP Code serves more than one county, the number represents the county with the greater number of deliveries.

County Name – The name of the county or parish associated with the FIPS Code.

Using the City/State File

The City/State File can be used alone or with other AMS products to help users validate or correct the ZIP Code and city name of an address. However, the ZIP Code is usually the element missing if an address is incorrect.

To determine the correct ZIP Code using the City/State File, user software should search the file for a match to the city name with the state. If a single match is found, the ZIP Code can be applied to the address. If more than one match is found, other files must be used to determine the correct ZIP Code.

If the input address is 4016 CHURCH RD, MILLERS MD, the City/State File will indicate that there is only one ZIP Code listed for Millers, MD: 21107.

A user who wants to obtain a 5-digit ZIP Code could confidently apply 21107 to the address.

If the input address is 11401 CAROLINA RD, CLEVELAND OH, the City/State File reveals that there are multiple ZIP Codes associated with that name. Therefore, the user must access one of the AMS products that provides street-level information to determine the correct ZIP Code. The Five-Digit product provides ZIP Codes for specific street within “multi-ZIP Coded” cities (those having more than one delivery ZIP Code).

Some City/State subscribers who use the product as a stand-alone may, depending upon how they use the data, actually corrupt addresses. For example, if the file is used only to apply city names to customer ZIP Codes, an incorrect or invalid name may be applied to an address. If the file is stripped of all records except the USPS preferred last-line name records, many other valid names are deleted. For instance, customers living in Edina MN 55436 – a valid mailing name in that ZIP Code – will have their city name changed to Minneapolis MN 55436. In addition, stand-alone use of the City/State product also depends upon accurate presentation of the ZIP Code. If the ZIP Code is miskeyed or otherwise incorrect, it is impossible to validate the input, and there is little chance that the mailpiece will be delivered.

Proper use of the City/State File requires presentation of the city name, state abbreviation, and ZIP Code. If the ZIP Code is not available and the city name matches to more than one ZIP Code within the state, street-level products must be used to resolve the ZIP Code. If the ZIP Code is available, the City/State File may be used to ensure that the customer’s city name is listed under a particular ZIP Code. If the name is listed, check the Mailing Name Indicator: if the indicator lists Y for the matched city name, return it on the output address; if it is N for the matched city name, change the input city name to the USPS preferred last line name provided in that record.

Note: Each record in the street-level products is assigned a City/State key that identifies a mailing name record in the City/State File. If a street-level product is used and the input city name indicator is set to N in the City/State File, the output city name should be that identified by the street-level City/State key.

The Carrier Route Rate Mail Indicator is a new feature in the City/State File that specifies whether a discount is provided for letter-sized carrier route sorted mail for the presented ZIP Code.

The indicator relates to only two types of carrier route presort discounts: First Class, Automated Letters and Cards, and Standard Mail, Enhanced Carrier Route Automated Letters (delivery point barcode required for both types of mail). For both discounts, the Carrier Route Rate Mail Indicator must be set to Y for the ZIP Code.

For more information on the City/State File, contact the National Customer Support Center at (800) 238-3150.

Domestic Mail Reporting Use of CDS Product Information

Computerized Delivery Sequence (CDS) products are fulfilled on a quarterly basis unless the US Postal Service provides an update in the interim. Mailers should treat these products as they would any other Address Information System (AIS) product, including the same use dates (*Domestic Mail Manual* (DMM) 50, A950.3). For example, mailers may use the January 15 product release on mailings presented to the USPS until June 30.

Under Classification Reform, CDS-qualified mailers (those who own the product or use address label materials produced by others) need to ensure that the date of the CDS product used (which appears on the CDS Product Invoice as the cycle date or on the CDS confirmation form) appears on Form 3553, *Coding Accuracy Support System (CASS) Summary Report*, in block B3 (date of ZIP+4 database). CDS mailers have to supplement this documentation with information on the date the labels were actually created by the CDS product.

Mailers should report the date the labels were created on Form 3553 in block B2 (Date List Processed).

When creating labels or address lists using the CDS product, the Form 3553 may be either (1) facsimile created by the National Customer Support Center (NCSC), with the date shown by the NCSC in block B2 deleted and the date the labels were created inserted, or a new facsimile Form 3553 or a completed USPS Form 3553 showing the correct dates as described above in blocks B2 (date labels were created) and B3 (date of ZIP+4/CDS database).

With the October CDS product release, the US Postal Service will begin producing AIS products, including CDS, on a bimonthly basis. The length of time that mailers may use the product to produce mailings and mailing labels will then coincide with the exhibit in DMM A950.3. Mailings must be presented to the USPS within 90 days of the date the labels were created.

Using addresses produced from the CDS product within the required timeframes qualifies mailings for both automation rates and any carrier route rates.

ZIP ALERT is published quarterly by the United States Postal Service's National Customer Support Center in Memphis, Tennessee. To order additional copies of **ZIP ALERT**, call the Customer Service Department at (800) 238-3150. Submit written articles, information, or changes of information to

Renumbered Post Office Boxes

This file lists post office boxes that have been renumbered. The old range is the range of PO Box addresses prior to renumbering, and the new range is the range after renumbering. If the numbering change coincided with a ZIP Code change, the newly assigned ZIP Code appears in the New ZIP column. The Continuity column indicates whether the renumbering was accomplished only by changing or adding leading characters. If that was the case, Y appears in the Continuity column.

OLD ZIP	NEW ZIP	OLD RANGE		NEW RANGE		CONTINUITY
		LOW	HIGH	LOW	HIGH	
00773	00773	6001	6010	60001	60010	Y

ADDRESS CONVERSIONS

The following is a list of ZIP Codes within which all or some of the addresses have been changed due to local government action. The Postal Service has agreed to use these new addresses as mailing addresses. Should a mailer wish to obtain the new addresses for customers in the affected ZIP Codes, they may contact the respective delivery unit, the Address Management Systems office serving that area or any LACS licensee. We also recommend you review the information posted on the Rapid Information Bulletin Board System (RIBBS) via our toll free number, (800) 262-9541. This information can be found on RIBBS under the *Address Management Menu*, item 1—text files LACSZIP.TXT, LACSZCHG.TXT and LACSMGMT.TXT.
